

PLANNING

EXERCISE SCENARIO - FANTASY

THE BELLICOSI

The Bellicosi are an alien species planning to invade and conquer a tiny blue planet revolving around an inconsequential star.

1. The Bellicosi have determined how much time and money the invasion is likely to cost, based upon factors including the number of inhabitants and level of technology on the target planet, and the distance they'll need to travel.

PLAN

2. The invasion will be governed by standards and procedures that leverage lessons learned from prior invasions. This guidance is electronically stored in an AlienPoint site, and must be used for all Bellicosi invasions.

PLAN

3. Once the planet is conquered, the Bellicosi intend to “peaceably” govern its inhabitants and commence mining operations. They’ve pulled together a plan to seamlessly switch over to that phase of the mission.

PLAN

4. All invasion personnel will be trained in the physical characteristics of the target planet and the behavior of its inhabitants.

PLAN
